

Cylindrical Nozzle

FILTER NOZZLES FOR WATER TREATMENT

Thermoplastic filtering nozzles for different water treatment. Applications including : treatment of drinking water, dematerialized water production,... etc, can also be applied to sand tank, printing and dyeing, swimming pools and other industrial water, the same can be used in industrial wastewater, sewage treatment projects. Our products are made with only the best material.

POLYPROPYLENE (PP) This is an optimum thermoplastic resin for different fields as well as drinking water but

Model	F0507 -3/4"	F0508 -1"
Effluent	0.5~1 T/H	0.5~1 T/H
Thread	G 3/4"	G 1"
GAP	0.25 mm/0.5 mm	0.25 mm/0.5 mm

Shank diameter	27 mm/32 mm
The largest diameter	63 mm
High	90 mm
Flow area	486 mm ²
Material	PP
Shape	Cylindrical
